

Anne E. McMills

Anti-Racist and Anti-Oppression Ethos

I am committed to the principles of anti-racism and anti-oppression. Through awareness and active engagement in fair social justice practices, we can dismantle systemic oppression based on all categories of social identity, including race, ethnicity, gender, sexual orientation, age, varying developmental and physical abilities, socioeconomic status, religious beliefs, and others. I strive to proactively use my privilege and agency to disrupt racist practices and to actively support and promote anti-racist policies in order to produce and sustain racial equity, and to free members of the global majority from the systemic misuse and abuse of power by institutions.
